

CONSTRUCTION NOTICE

BORING OPERATIONS CS-28(P), CS-29(P), CPT-18, AND CPT-19
Permits from DPH (Project Number 4389) and DPW (Number 10BW-0010)

Project Description

The San Francisco Municipal Transportation Agency (SFMTA) and PB/Telamon with Treadwell & Rollo will begin drilling operations for supplemental geotechnical investigations; the purpose of which are to provide critical geotechnical and hydro-geologic information needed for final design and construction of the proposed subway tunnel and associated structures.

Here are some facts that you should be aware of:

- Work will be performed during regular weekday working hours (7am to 6pm) on **Wednesday, March 10 through Monday March 15, 2010**
- In the parking lanes near 4th Street and Harrison Street
- There will be a one-lane traffic lane closure on 4th Street on March 10 and March 11.
- Parking spaces will be temporarily closed as needed during construction. Please see construction signs for exact location and times.
- Drilling will be performed using a truck-mounted drill rig, which will remain on the boring location for the duration of drilling.
- Please expect a minor increase in noise as a result of drilling.
